COIL-BRITE-III

**FREE RINSING
EVAPORATIVE COIL
CLEANER & DISINFECTANT**

- Virucidal
- Cleans and Deodorizes
- Disinfects - Sanitizer
- Exclusive Free Rinsing Formula Rinses in its own Condensation
- Easy to Use & Economical

PRODUCT #1141

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

COIL-BRITE III

Free Rinsing Evaporative Coil Cleaner & Disinfectant

Why just clean? Clean and disinfect at the same time! **COIL-BRITE III** eliminates the need for high pressure sprayers or bulky tank sprayers. This powerful, high volume aerosol product will clean, sanitize and disinfect even large commercial A/C coils quickly and easily and also disinfects in one easy step. Simply spray **COIL-BRITE III** cleaner evenly over entire coil from the air intake side. No rinsing required. Dirt and lint wash away with condensate.

DIRECTIONS FOR USE: PROTECTIVE EYE WEAR IS RECOMMENDED

1. Turn Fan OFF.
2. Shake can well before using.
3. Remove matted material with brush or fine comb.
4. Hold can 12 inches from air intake side of coil.
5. Spray evenly onto coil, being sure to cover entire coil.
6. Turn Fan ON. No rinsing required.

ADDITIONAL INFORMATION

COIL-BRITE III is a non-acid, biodegradable, coil cleaner that really packs a powerful punch. Our no rinse formula cuts labor time in half. **COIL-BRITE III** not only cleans coil but also disinfects in one easy step. Just spray **COIL-BRITE III** evenly over entire coil from air intake side. Dirt and dust simply wash away with condensate. **COIL-BRITE III** is a high pressure aerosol product that penetrates between the fins of the coil and expands to clean the inside of the coil as well as the outside. **COIL-BRITE III** deodorizes and leaves a clean, fresh scent. No longer will you get that musty smell of mildew the first time the A/C unit is turned on. **COIL-BRITE III** is safe on all types of coils; aluminum, galvanized, copper, etc.

- Q. Why clean air conditioning coils?
A. Dirty coils do not transfer heat/cold well causing the A/C compressor to run constantly. This often leads to premature equipment failure not to mention astronomical utility costs. Use **COIL-BRITE III** on a preventive maintenance schedule.
- Q. My coils don't look like they need cleaning.
A. A/C coils get coated with a thin layer of dust and grime in only a matter of months. Often this dirt doesn't make the surface look discolored or dirty however periodic cleaning will maintain peak efficiency and economy.
- A **Superco Specialty Products** representative will be happy to outline a good preventive maintenance schedule for all of your valuable equipment. Service is a very important part of our business relationship.
