D.C.D.A. TOTAL RELEASE is an effective disinfectant for hard surfaces for general hospital use, schools, medical, dental and business offices, sickrooms, nursing homes and ambulances.

D.C.D.A. TOTAL RELEASE is in a total release fogger style product that can treat up to 6000 cubic feet in 1 application. This product will control the following organisms: Salmonella choleraesuis, Staphylococcus aureus, Trichophyton mentagrophytes, Pseudomonas aeruginosa, Streptococcus pyogenes, HIV-1 (associated with AIDS) and tubercle bacilli.†

D.C.D.A. TOTAL RELEASE will control mildew growth on fabric for 14 days and on hard surfaces for 21 days. Available in both Citrus and Linen fragrances.

GENERAL USES:

Disinfecting: Bed springs and frames, bedside and office furniture, chart racks and equipment cabinets, countertops, door knobs, office machinery, sinks and mirrors, light fixtures and switches, supply, dressing and trash carts, telephones, waste cans and laundry hampers, wheel chairs and walkers, urinals, etc.

Deodorizing: Offensive odors from post-colostomy, post-ileostomy dressing and bags, malignant diseases, homes, kitchens, bathrooms, industrial plant processes, food processing and packaging plants, food stores, fecal matter, urine, burns, smoke, mildew and mold, decay, garlic, onions, food putrefaction, perspiration, stale air, tobacco, sickrooms, musty closets and fish.

DIRECTIONS FOR USE:

For Pre-cleaning: Pre-clean surfaces with a suitable detergent

prior to disinfecting. **For Disinfecting:** Hold dispenser upright 6 to 8 inches away from surface. Spray 2 to 3 seconds or until entire surface is wet. Allow to remain at least 10 minutes. Allow to air dry or remove with clean dry cloth. **For Deodorizing:** Hold dispenser upright and spray towards center of room 3 to 5 seconds. **For Mildew Control:** Spray surface until moist. Do not use on polished wood furniture or rayon fabrics. Repeat application periodically to maintain control.

D.C.D.A. TOTAL RELEASE CITRUS / LINEN

Special Instructions

*Kills HIV-1 (AIDS virus) on precleaned environmental surfaces/objects previously soiled with blood or body fluids in healthcare settings in which there is an expected likelihood of soiling of inanimate surfaces or objects with blood or body fluids, and in which the surfaces or objects likely to soiled with blood or body fluids can be associated with the potential for transmission of immunodeficiency virus type 1 (HIV-1, associated with AIDS).

For cleaning and decontamination against HIV-1 (AIDS virus) of surfaces or objects soiled with blood or body fluids.

Personal protection: Disposable latex or vinyl gloves, gowns, face masks or eye coverings as appropriate, must be worn during all cleaning of body fluids, blood and decontamination procedures.

Cleaning procedures: Blood and body fluids must be thoroughly cleaned from surfaces and objects before application of disinfectant. **Contact time:** After precleaning, 5 minutes at room temperature (20-25° C). Use a 10 minute contact time for disinfection against all other bacteria, fungi, and viruses claimed (listed on labeling).

Disposal of infectious materials: Blood and other body fluids should be autoclaved and disposed of according to federal, state and other local regulations for infectious waste disposal.
