

ENER-GIZE

Fuel Conditioner Concentrate

FORMULATED FOR USE
IN ALL VEHICLES

- DIESEL ENGINES
- GASOLINE ENGINES
- LPG (PROPANE) ENGINES
- KEROSENE SYSTEMS

Product: # 7057 12 oz.

Product: # 5126 Bulk

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

ENER-GIZE is a modern fuel conditioner concentrate specifically engineered to clean and remove carbon and gum deposits from all internal engine parts. Regular use of **ENER-GIZE** will keep valves and carburetors clean, reduce moisture build up, neutralize sulfur and acids, and increase mileage per gallon of fuel. **ENER-GIZE** is designed to work equally well in all types of fuel systems including diesel, gas, LPG, and kerosene.

DIRECTIONS FOR USE:

ENER-GIZE should be added to fuel tank at time of refilling at the rate of 1 gallon to 200 gallons of fuel. When using 12 ounce containers, each bottle will treat 20 gallons of fuel. For fleet use, treat 1000-1200 gallon fuel tanks with one 6 gallon pail of **ENER-GIZE** with each fuel delivery.

AREAS OF USE:

Excellent results achieved when used for: trucks, fork lifts, standby generators, golf carts, tractors, mowers, service vehicles, fleet cars, compressors, motorcycles, boats, recreational vehicles, etc.

INGREDIENTS	CAS NUMBER
BUTYL HYDRATE	78-92-2
CRESOL	1319-77-3
PETROLEUM DISTILLATE	8002-05-9

Additional Information

Fuel maintenance is an important aspect to any preventive maintenance program but is often overlooked. The fuel you put into your vehicles and equipment is their equivalent to our food, and a healthy diet means a long active life. Whether you use your equipment every day, once a month, or once a year, you need to use **ENER-GIZE** every time you fill it with fuel. Frequently run engines will develop carbon deposits that can cause valves to stick and injectors to clog and ultimately reduce performance and fuel efficiency. Seldom run engines can develop gum and varnish deposits and accumulate moisture causing problems with fuel intake and ignition systems. **ENER-GIZE** eliminates all these problems and more and is very easy to use. Simply add the appropriate amount of **ENER-GIZE** when you refuel and that's it. For grounds care equipment and fleet yards, we recommend adding **ENER-GIZE** to your fuel cans, tanks, or trucks to make application that much easier.
