

The YES Company!!

**SUPERCO**  
SPECIALTY PRODUCTS

**ELECTRA PROTECTA**  
**WEATHER INSULATOR**

- Protects Parts and Components from water, dirt, and airborne particles.
- Protects Electrical Terminals and Connectors from corrosion and moisture.
- Keeps out water (even when completely submerged), wind, dirt and foreign elements.

**Product # 1024**

**FOR PROFESSIONAL USE ONLY**  
CONSULT LABEL AND MSDS BEFORE USING.

# ELECTRA PROTECTA

## Weather Insulator

**ELECTRA PROTECTA** was designed to protect electrical Connectors and terminals from water, dirt, wind, airborne particles, and other natural elements. **ELECTRA PROTECTA** is an elastomeric compound that will inhibit bacterial attack and fungus growth. This can be a great benefit when humidity is a factor.

**ELECTRA PROTECTA** is:

- FLEXIBLE
- EXTREMELY DURABLE
- ABSORBS VIBRATIONS
- INSULATES JUNCTION BOXES AND EXTERIOR WIRE CONNECTIONS
- ENCAPSULATES WIRE NUTS AND CABLE CONNECTORS
- WITHSTANDS UP TO 37,500 VOLTS AT 1/8' THICKNESS

### DIRECTIONS:

Shake well before and during each use. Due to the amount of rubber, the nozzle may on occasion sputter or momentarily clog. Continue to spray as clogging will clear after a few seconds. Peel away any accumulation from nozzle tip. Wires and terminals to be sealed must be clean and dry. **SPRAY ELECTRA PROTECTA** on electrical connection area. Allow to dry for about 45 minutes. Apply second coat if

greater thickness is required or needed. **NOTE: ELECTRA PROTECTA** is not to be sprayed on running Electrical Motors or Live Wires. Disconnect all electrical equipment before using.

## Additional Information

**ELECTRA PROTECTA** was designed to protect electrical connectors and terminals from water, dirt, wind, airborne particles, corrosion, moisture and other natural elements. **ELECTRA PROTECTA** is flexible, extremely durable, absorbs vibrations, insulates junction boxes and exterior wire connections, encapsulates wire nuts and cable connections and withstands 37,500 volts at 1/8" thickness. **ELECTRA PROTECTA** sprays on as an aerosol then sets up in minutes to a rubberized coating that is impervious to water and contaminants. Use around landscaping, swimming pools and anywhere electricity and water are in close proximity. For a demonstration of the effectiveness of **ELECTRA PROTECTA**, Contact your local **SUPERCO** representative.
