FLEXI-COAT BLACK & WHITE

Amazing Roof Patch and Repair Material

FLEXI-COAT roof repair leaves a firm coating that stays flexible. **FLEXI-COAT** will not sag or drip and the coating is impervious to water. The film will not freeze or crack in cold weather. This abrasion resistant coating will not peel. **FLEXI-COAT** seals out rust and corrosion. Economical and easy to use

Excellent for use as a sealer after pruning trees.

DIRECTIONS FOR USE:

Shake can well until ball rattles and then for a further 20 seconds. For best results use at room temperature. Remove dust from area before application. Hold can approximately 10-12 inches from surface and spray with a side to side motion. Multiple coats can be applied allowing 20-30 minutes drying time between coats. Leaks, breaks and large cracks may be repaired by coating around defect and applying mesh such as heavy cloth, wire mesh or fiberglass before final coating is applied. Clean actuator tip after each use by inverting can and spraying until only gas comes out.

Add it on al Information

FLEXI-COAT is a revolutionary product that simply put is a heavy-duty roof patching material in a can. **FLEXI-COAT** comes in black or white color to match any rooftop, RV, or siding. No more hauling 5 gallon buckets up to the roof for small jobs, just grab a can. Leaking gutters? Not a problem any more. Simply spray the inside of the gutter with **FLEXI-COAT**. This product is tough, flexible, and impervious to water. **FLEXI-COAT** will not freeze, crack, or peel which makes it the ideal solution for flashings, down spouts, gutters, and repair jobs on roofs and recreational vehicles. **FLEXI-COAT** works great on asphalt, metal, and wood as well as composition type roofs. Do you have cracked or leaking sinks that you would rather not replace? **FLEXI-COAT** seals up cracks and leaks eliminating expensive replacements and excess labor. Just spray the underside of the sink, drain pipes, P-traps, J-bends and forget about costly parts.
