FRAGRANCE BEADS are a new concept in air fresheners. These compact bags can refresh an entire room or office in minutes utilizing the air conditioning or heating system already in use at your facility. This remarkable new technology counteracts foul odors in minutes and replaces them with clean, fresh air and a pleasant fragrance that last for up to 30 days. Laboratory tests have proven that a pleasant smelling work environment will foster a more alert and productive working atmosphere with less job "burnout". **FRAGRANCE BEADS** are clean, safe and easy to install and used bags can be thrown into the "Plastic Recycle" bin since the entire product is environmentally friendly and recyclable.

DIRECTIONS FOR USE:

Each package contains one Fresh Air Fragrance Bag. For problem odors or for large areas, use multiple bags simultaneously. Install the bag into the air system for continuous control for up to 30 days. The important thing to remember when placing a Fresh Air Bag is "airflow". Position the bag where the air will flow through the Fresh Air Bag and circulate throughout the room. Place into each vacuum cleaner

Additional Information

FRAGRANCE BEADS are a unique and different method for large area deodorizing. The use of sprays and wall mounted units are fine for small restrooms but neutralizing foul smells in an entire office building or hotel or even a sports arena is a much more difficult task. Our new **FRAGRANCE BEADS** are designed to be mounted into the HVAC system and are effective enough to freshen the entire facility while the ventilation system moves the air around. This remarkable product can also be put into vacuum cleaners to deodorize automatically each time the vacuum is used. Why spend excess labor spraying conventional deodorizers when our **FRAGRANCE BEADS** can do the work for you. Available in eight pleasant scents; Cool Citrus Sunshine, Hawaiian Paradise, Mountain Air, Mountain Very Berry, Orange Dreamsicle, Rain Forest, Vanilla Silk and Watermelon.
