LAUNDRA CARE

Powdered Laundry Detergent

LAUNDRA CARE Powder is a combination of the newest developments in chemistry. This formula contains anionic and non-anionic synthetics combined with selected phosphates and alkalies compounded to cover most specialized needs. Special water softening ingredients condition water, even in hard water. Exceptionally soiled garments such as overalls, uniforms, etc., will benefit from a 1 to 2 hour presoak, if possible. Under severe conditions, increase the amount used per load by 1/3 to 1/2 the regular specified quantity.

DIRECTIONS FOR USE:

For top loading washers:

Use 3/4 to 1 cup per load.

For washer/dryer combinations:

Use 3/4 cup per load.

For front loading washers:

Use 1/2 cup per load.

For spinner or wringer machines:

Use 1 cup for first load. For additional loads, use 1/3 cup or more each time water is reused.

Contains no hazardous ingredients as listed in the following references: (1) CFR 29, 1910.1000, subpart Z, REV 01JUL88; (2) The Director's List of Hazardous Substances (CA); (3) Threshold Limit Values and Biological Exposure indices for 1989-1990 (ACGIH)

Additional Information

LAUNDRA CARE Powdered Laundry Detergent is a specially formulated product designed for a wide range of applications and soil conditions.
