PERMA-BOND

Pipe Repair Kit

Now with Re-In-Force Repair Putty For Extra Bonding

DIRECTIONS FOR USE

Read and Follow Instructions Carefully

One: Clean area to be repaired. Lightly sand if necessary.

Two: Knead Re-In-Force Putty to a uniform color. Apply at once to surface where leaking occurs.

Three: Open package using protective gloves. **PERMA-BOND** should be immersed in water for 10-15 seconds in foil pack. Moisture will speed curing time.

Four: From both sides of damaged area, wrap **PERMA-BOND** from side to side tightly (Work quickly, curing starts immediately). Apply multiple layers of **PERMA-BOND** over area.

Five: Apply by kneading the wrap in the same direction as the wrap was applied to tighten and strengthen the bond. Allow repair to cure 20 to 25 minutes before re-pressuring. When used correctly, **PERMA-BOND** will withstand 150 psi and 600° F. If desired, Repair may be painted over after completely drying. Includes superco's Re-In-Force Epoxy Putty.

ADDITIONAL INFORMATION

PERMA-BOND is new technology for quick and easy permanent repair of all pipes. Can be used on Metal, Copper, Brass, Steel, PVC, Fiberglass, Plastics, Rubber Hose, and Cast Iron.

Can be used by: Plumbers, Pool and Spa Personnel, Grounds Care Personnel, and HVAC Personnel, etc.

In case of contact with eyes, DO NOT RUB and flush with water for 15 minutes.

Seek Medical Attention Immediately
