Additional Information

Superco's new air freshener technology is like none other. When the **SUPER-FRESH** is made and the plastic is heated into a liquid, at that point the fragrance is added. The product then cools and the fragrance is impregnated into the cell. The **SUPER-FRESH** will last up to 45 days and the fragrance is time released into the area that you want it to be placed.

SUPER-FRESH is the first and only air freshener dispenser that uses the fragrance as the air freshener. When changing, simply slip on the new cover...That's it! Now, instead of unlocking a dispenser, unloading the old refill, loading the new refill and replacing the cover, you just take off the old cover/refill and replace it with a **SUPER-FRESH** one. **SUPER-FRESH's** silent fan effectively disperses the fragrance in larger areas.

Each **SUPER-FRESH** cover is composed of a unique material containing twice as much fragrance as most other air fresheners which is released over 45 days. **SUPER-FRESH** is **Eco-Friendly** with refills that are 100% recyclable an VOC compliant. **SUPER-FRESH** is manufactured with over 50% less energy than typical plastic or steel containers. **SUPER-FRESH** continuously freshens for 45 days so you don't have the peaks and valleys (or spritzing showers) of metered aerosols. **SUPER-FRESH** is safe and no more spills on the floor. **SUPER-FRESH** is easy to use and each refill comes with a battery, so you simply replace the old cover with a fresh one...it's that easy.
