TILE KOTE
HEAVY DUTY TILE SEALER

TILE KOTE Heavy Duty Tile Sealer will give long lasting protection to tile, metal, wood, masonry, and concrete surfaces. **TILE KOTE** is a tough, glass clear coating that provides excellent resistance to most chemicals, solvents and corrosive materials. Use **TILE KOTE** to protect your tile from the grease and grime that can make restroom and entry floors look dull and dirty. **TILE KOTE** also seals the grout area and keeps grease and grime out so your tile will always look great. After using **TILE KOTE** normal cleaning routines will restore your floor to like new condition. **TILE KOTE** is tough and durable. For daily maintenance use **SUPERCO's SUPER-SUDS Neutral Floor Cleaner** for a shiny clean floor.

DIRECTIONS FOR USE:

1. Be sure surface is clean and dry. Good surface preparation will insure the longevity of the coating.
2. Apply **TILE KOTE** in thin, uniform coats with a lambs wool applicator available from **SUPERCO**. A brush or roller may be substituted if desired.
3. Allow ample drying time. 4 to 6 hours is recommended.
4. Additional coats may be applied for a shinier finish after allowing 24 hours dry time.

Additional Information

TILE KOTE Heavy Duty Tile Sealer is a specialized coating designed specifically for tile, terrazzo and similar surfaces. The advanced penetrating formula locks itself onto the surface of all types of tile including polished, ceramic and slate types. **TILE KOTE** provides a durable glass-clear surface that will not chip or peel and is resistant to oils, acid cleaners, alkaline detergents and salt water. Sealed surfaces can be maintained much easier than unsealed surfaces because **TILE KOTE** seals the pores of the tile and the grout and makes cleaning a breeze. After using **TILE KOTE**, surfaces may be cleaned with any type of cleaning solution without the possibility of damaging either the surface of the tile or the coating. For super high gloss, a floor finish may be applied over the **TILE KOTE** and maintained normally. For best results, especially in high foot or auto traffic areas, use **SUPERCO's DURASHINE 29% Solids Floor Finish**. For the ultimate in protection, beauty and durability use nothing less than **TILE KOTE**. Contact your local **SUPERCO** representative for more information.
