D-FOG
Plexiglas and Glass Cleaner

LEAVES A MICROSCOPIC PROTECTIVE COATING THAT REPELS DIRT, DUST, FINGERPRINTS, STATIC AND SMUDGES
GREAT ON GOLF CART WINDSHIELDS

Product: # 1016 Aerosol
Product: # 3005 Quarts
Product: # 5030 Bulk

FOR PROFESSIONAL USE ONLY
CONSULT LABEL AND MSDS BEFORE USING.

D-FOG Plexiglas and Glass Cleaner is a breakthrough in cleaning chemistry. Designed for use on plastic and glass, **D-FOG** cleans and leaves a microscopic coating to protect against scratching, dust, fingerprints, smudges, chemicals, salt, etc. **D-FOG's** anti-static coating also prevents fogging of windows and mirrors. Useful on acrylic, Plexiglas, Lexan, chrome, Formica, porcelain, fiberglass, marble, CRT screens, etc. Marks on treated surfaces easily wiped off. Excellent anti-fog on windows of public transportation vehicles.

D-FOG-A
Aerosol Foam Cleaner

Meets or exceeds the following specs:

- MIL-C-25769 H - Stress Cracking of Aircraft Transparencies
- MIL-P-25690 - Stretched Modified Acrylic Sheet
- MIL-P-83310 - Plastic Sheet Polycarbonate
- MIL-P-5425 - Sheet Acrylic Plastic
- Douglas Aircraft CSD-1 - Aircraft Transparency Sandwich Corrosion
- Boeing Letter - Lexan 9600

DIRECTIONS FOR USE:
Shake well. Spray from 6 to 8 inches. If surface is dirty, use first spray for cleaning then respray. Wipe with dry cloth then buff until clear. Extra coats will give extra protection.

Authorized by USDA for use in federally inspected meat and poultry plants.

Add ition al Inf or mat ion

Cleaning plastic surfaces like Plexiglas, Lexan and acrylic is a tricky job. These materials scratch easily but don't always clean as easily. **D-FOG** is the ideal product to use on all plastic as well as glass and most other hard surfaces. **D-FOG** is long lasting and non-abrasive so it will not scratch soft plastics. In addition, **D-FOG** leaves a protective coating so these areas will look great for a longer period of time. **D-FOG** resist smudges so your custodial staff will not have to clean glass entry doors and windows as often. Fingerprints on treated surfaces wipe off easily making maintenance a breeze. Excellent for use on smoked, colored, tinted, transparent, or mirrored glass and plastic surfaces. Put **D-FOG** to the test. Take a pair of glasses and spray one lens with **D-FOG** and wipe with a soft cloth or lint free wiper, then buff clear. Blow onto both lenses to see that the treated side will not fog up. Put glasses back on to see the improved clarity of sight through the treated lens. You may also notice that minute scratches have now disappeared.
