

The YES Company!!

**DURASHINE**

**Super High Gloss Floor Finish**

- 29% NON-VOLITILE SOLIDS
- EXCELLENT SLIP RESISTANCE
- EXTRA GLOSS AND DURABILITY
- IDEAL FOR HIGH-SPEED BURNISHING

**Product # 5046**

**FOR PROFESSIONAL USE ONLY**  
CONSULT LABEL AND MSDS BEFORE USING.

**DURASHINE** is a special high-solid formulation of polymers and waxes. **DURASHINE** has excellent leveling properties. Gives an extremely high gloss with excellent durability, scuff resistance and slip resistance. **DURASHINE** can be damp mopped without dulling the shine. **DURASHINE** can be used with low-speed and high speed floor machines.

**DIRECTIONS FOR USE:**

Remove old floor with a good stripper. Rinse well and allow to dry. Apply thin coats of **DURASHINE**, allow to dry. Apply thin coats of **DURASHINE**, allow to dry 10-15 minutes between each coat.

**DAILY MAINTENANCE:**

Sweep daily. Damp mop with a neutral cleaner to remove scuff marks and surface dirt. If desired, spray-buff by diluting water in a spray bottle and use with a spray buff pad. To restore the **DURASHINE** floor finish to its original high lustre, use a high polymer floor finish restorer. Do not pour used material back into the remaining portion of this container.

**Additional Information**

**DURASHINE** Super High Gloss Floor Finish is possibly the finest product of its type. **DURASHINE** features 29% solids, anti-slip additives and a metallic interlock acrylic polymer. This advanced formula gives the user a long list of benefits plus a high level of durability. **DURASHINE** is self-leveling which means you simply mop the finish on the floor and let it dry for a high-gloss appearance. **DURASHINE** can be low or ultrahigh speed buffed which makes it an ideal product no matter what kind of equipment you may have. Each time **DURASHINE** is buffed the finish gets harder and harder which gives this product the ability to outlast most floor waxes by as much as 10 times. For example, an average floor with average traffic could be finished with **DURASHINE** then maintained with a high gloss for up to three years before the floor will need to be stripped and refinished. This level of durability is not found in other floor care products and can reduce maintenance costs dramatically. Consult your **Superco Specialty Products** representative on how to best maintain the floors in your facility.
