

# GOBBLE

Citrus Based D-Limonene  
Organic Cleaner & Degreaser  
Drain and Sewer  
Treatment & Deodorizer  
Non-Chlorinated

- USE WITH SUPERCO AUTOMATIC DISPENSING SYSTEMS
- DISSOLVES GREASE AND SCUM COMPLETELY
- CLEANS AND DEODORIZES GARBAGE DISPOSALS
- ELIMINATES BUILD-UP IN GREASE TRAPS
- SAFE ON ALL TYPES OF PLUMBING SYSTEMS
- ELIMINATES THE COST OF MANUAL CLEANING

Product: # 7036OS Pints  
Product: # 7036 Quarts  
Product: # 5120 Bulk

FOR PROFESSIONAL USE ONLY  
CONSULT LABEL AND MSDS BEFORE USING.

## GOBBLE

Drain and Sewer Treatment and Deodorizer

- Natural Citrus Base • Non-Acid
- Non-Caustic • Non-Corrosive
- Environmentally Safe
- Non-Chlorinated

GOBBLE is a remarkable blend of grease gobblers. Use regularly to reduce the build-up of grease, soap scum, slime, etc. Controls odor in garbage disposals, around dumpsters, sumps, sewage treatment plants, restaurants, trash compactors and drains. Will not affect bacterial action. GOBBLE instantly begins dissolving even the toughest grease build-up. When used as a cleaner, GOBBLE destroys even the worst grime while deodorizing at the same time. Dump the dirty mop water down the drain and treat your plumbing at the same time.

### DIRECTIONS FOR USE:

**DECLOGGING:** Use weekly to keep drains free-flowing. Use on drinking fountains, ice bins, condensate pans, dishwasher drains, etc., to control slime & algae growth in pan or drain.

**PREVENTATIVE MAINTENANCE:** 8 oz. weekly to all drain openings and let stand for 10 minutes the flush with warm water. For grease traps under 20 cubic feet (150 gallons equals 20 cubic feet), add 5 oz. daily. For larger traps or clogged drains, pour 12 to 16 ounces into drain.

## Additional Information

GOBBLE Pints, Quarts & Bulk Citrus D-limonine Drain and Sewer Treatment are a unique alternative to the many drain maintenance products on the market today. This revolutionary formula is non-caustic, non-acid and environmentally safe and is safe on all types of plumbing systems including garbage disposals. GOBBLE is non-corrosive and can be poured into drains, grease traps or garbage disposals and left for any length of time without adverse effects. The natural citrus solvent that is the base ingredient in GOBBLE starts working immediately dissolving the grease and scum that causes most blockages. GOBBLE will not affect bacterial action or reduce the effectiveness of enzyme treatments. However, many dish washing chemicals common to restaurants and kitchens will neutralize bacteria and enzyme drain maintainers so use GOBBLE where these products have failed. Grease traps, sumps, lift stations and septic tanks are all good candidates for a Knight Watch Drain Maintenance System from SUPERCO. This fully automatic injection system dispenses a measured amount of GOBBLE each night to insure the best preventive maintenance possible. Consult your SUPERCO representative for more information and installation.
